Consecutive repeated words

Given a sequence of words, print the length of the longest consecutive subsequence that only contains the first word. That is, if the sequence is \( s_1, \ldots, s_n \), print

\[
\max\{j - i + 1 : 1 \leq i \leq j \leq n \land s_i = s_{i+1} = \cdots = s_{j-1} = s_j = s_1\}.
\]

Input

Input consists of a non-empty sequence of words.

Output

Print the number of words of the longest consecutive subsequence that only contains the first word.

Sample input 1

```plaintext
hello bye bye hello hello hello bye hello hello
```

Sample output 1

```
3
```

Sample input 2

```plaintext
one two two three three three
```

Sample output 2

```
1
```
