Tripling a matrix

Write a program that reads a matrix $m \times n$ and prints it with its elements tripled.

Input

Input consists of two natural numbers strictly positive m and n, followed m lines with n integer numbers each one.

Sample output

Output

Print the matrix with its elements tripled, following the format of the instance.

Sample input

4 6 15 21 18 12 3 6 5 7 6 4 1 2 6 24 3 9 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24 24
