Examen extraordinari d'Algorísmia, FME (2015-06-26)

---

Given  $n$  words in one language  $X$ , and a text with  $m$  words written in another language  $Y$ , print all the possible translations of the text to  $X$ , assuming that there is a bijection between the words of  $X$  and  $Y$ .

**Input**

Input consists of several cases. Every case begins with  $n$ , followed by the  $n$  words of the language  $X$ , in increasing order, each one made up of between one and six lowercase letters. Follow  $m$ , followed by the  $m$  words of the text written in  $Y$ , each one made up of between one and six uppercase letters. This text contains exactly  $n$  different words. Assume  $1 \leq n \leq 6$  and  $n \leq m \leq 1000$ .

**Output**

For every case, print in alphabetical order all the possible translations of the text in  $Y$  to  $X$ . Print a line with 10 dashes at the end of each case.

**Sample input**

```
2 bye hi
4 HOLA ADEU ADEU HOLA

4 cat dog fly horse
8 MOSCA GOS GOS CAVALL GAT GAT GAT GOS

1 one
3 UN UN UN
```

**Sample output**

```
bye hi hi bye
hi bye bye hi
-----
cat dog dog fly horse horse horse dog
cat dog dog horse fly fly fly dog
cat fly fly dog horse horse horse fly
cat fly fly horse dog dog dog fly
cat horse horse dog fly fly fly horse
