
Longest palindrome

P39399_en

Quinzè Concurs de Programació de la UPC - Final (2017-09-13)

Given a string s , please compute the longest suffix of s that is a palindrome, that is, that reads the same backward as forward.

Input

Input consists of several s , each one made up of between 1 and 10^6 lowercase letters.

Output

For every s , print the length of the longest suffix of s that is a palindrome.

Sample input

```
i
anna
abcbapep
zzzzzzzz
buenopuesmoltbepuesadios
```

Sample output

```
1
4
3
8
1
```
