
Distance between two points

P46254_en

Using the definition

```
struct Point {  
    double x, y;  
};
```

write a function

```
double dist(const Point& a, const Point& b);
```

that returns the euclidean distance between two points @a@ and @b@.

Observation

You only need to submit the required classes; your main program will be ignored. Strictly obey the type definitions of the statement.
