## Card game

P54504_en
Concurs On-line OIE 2007 (2007)
You are playing a card game with a friend. For this game only the suit of the cards matters. The four suits are clubs, diamonds, hearts and spades, with the following values:

| Suit | Symbol | Value |
| :--- | :---: | :---: |
| Clubs | $\mathbf{\$}$ | 1 |
| Diamonds | $\diamond$ | 5 |
| Hearts | $\diamond$ | 8 |
| Spades | $\mathbf{~}$ | 14 |

Your friend selects a number $n$, and you must show cards whose total value equals $n$, by using the minimum possible number of cards. Assume that you have an unlimited number of cards of each suit.

## Input

Input consists of several cases, each one with a natural number $n$ between 0 and 500000 . Input ends with a -1 .

## Output

For every $n$, print the corresponding result.

| Sample input | Sample output |
| :--- | :--- |
| 16 | 2 |
| 31 | 4 |
| 91 | 8 |
| -1 |  |
