
Count and add

P71649_en

Write a procedure

```
void count_and_add(int& num, int& sum);
```

to read a sequence of integer numbers until its end, and store in @num@ how many numbers it has, and store in @sum@ the sum of those numbers. For instance, if the input sequence is

```
10 -3 23
```

the values after the call must be @num@ = 3 and @sum@ = 30.

Observation

You only need to submit the required procedure; your main program will be ignored.
