## Looking for an a

P75149\_en

---

Write a program that reads a sequence of characters ended in a dot and tells if the sequence has any lowercase 'a' or not.

### Input

Input consists of a sequence of characters ended in '.'.

### Output

Print "yes" or "no" depending on whether 'a' appears in the sequence or not.

#### Sample input 1

I have some a's.

#### Sample output 1

yes

#### Sample input 2

I do not.

#### Sample output 2

no

### Problem information
