## Sum of fractions

P76024\_en

---

Write a program that reads triples of natural numbers  $a$ ,  $b$  and  $k$ , and for each one computes and prints the result of

$$\frac{1}{a} + \frac{1}{a+k} + \frac{1}{a+2k} + \dots$$

for all fractions with denominator smaller than or equal to  $b$ .

### Input

Input consists of several triples of natural numbers  $a$ ,  $b$  and  $k$ , such that  $1 \leq a \leq b$  and  $k \geq 1$ .

### Output

For each triple, print in a line the result of the sum with four digits after the decimal point.

#### Sample input

```
1 3 1
5 5 2
5 6 2
5 7 2
```

#### Sample output

```
1.8333
0.2000
0.2000
0.3429
```
