
First occurrence

P84219_en

Write an efficient function

```
int first_occurrence (double x, const vector<double>& v);
```

that returns the position of the first occurrence of x in the vector v . If x does not belong to v , return a -1.

Precondition

The vector v is sorted in nondecreasing order.

Observation

You only need to submit the required procedure; your main program will be ignored.
