## Haskell — Hello/Bye

P87974\_en

---

Write a program that reads the name of a person and writes a nice message.

### Input

The input is the name of a person.

### Output

Is the name starts with an A, 'Hello!' must be written. Otherwise, 'Bye!' must be written.

### Observation

In order to solve this problem in Haskell, write a *main* action and choose the GHC compiler.

#### Sample input 1

Alexander

#### Sample output 1

Hello!

#### Sample input 2

Ruth

#### Sample output 2

Bye!
