## Control C501B

## P96293\_en

---

Your task is to write a program that reads a sequence of words and prints them in alphabetical order.

### Input

The input starts with a natural number  $n$  and continues with the  $n$  words that your program must sort. All the words are formed exclusively by lowercase letters.

### Output

The output is a line with the  $n$  words of the input in alphabetical order, separated by a comma.

### Observation

You must use the algorithm *selection sort* to solve this problem. Any other method will be qualified with a zero.

#### Sample input 1

```
3 helen george john
```

#### Sample output 1

```
george, helen, john
```

#### Sample input 2

```
11
a bird in the hand is
worth two in the bush
```

#### Sample output 2

```
a, bird, bush, hand, in, in, is, the, the, two, worth
```

#### Sample input 3

```
7 a az b b bz z za
```

#### Sample output 3

```
a, az, b, b, bz, z, za
```

#### Sample input 4

```
0
```

#### Sample output 4

#### Sample input 5

```
1 hello
```

#### Sample output 5

```
hello
```
