
Curly brackets and parentheses**P96529_en**

Write a program that reads a sequence of words with curly brackets and parentheses, and for each one prints if the curly brackets and the parentheses close correctly.

Input

Input is a sequence of words consisting of `'['`, `']'`, `'('` and `')'`.

Output

For each word, print `"yes"` or `"no"` depending on if the curly brackets and the parentheses close correctly or not.

Sample input 1

```
[] ( [] () )  
(( [] ) ()  
[] (  
(( [] ))
```

Sample output 1

```
yes  
no  
no  
yes
```
