# Minimum and maximum                                P98458_en

Write a procedure

**void** *min_max*(**int** *a*, **int** *b*, **int**& *mn*, **int**& *mx*);

to store in *mn* the minimum of *a* and *b*, and store in *mx* the maximum of *a* and *b*. For instance, if called with $a = 7$ and $b = -3$, the values after the call must be $mn = -3$ and $mx = 7$.

## Observation

You only need to submit the required procedure; your main program will be ignored.

## Problem information
