Write a procedure

```c
void print(int s, char c, int n);
```

to print a line with \( s \) spaces followed by \( n \) characters \( c \). For instance, these three calls

```c
print(0, 'X', 3);
print(1, 'y', 4);
print(2, 'A', 2);
```

produce this output:

```
XXX
 YYYY
  AA
```

**Observation**

You only need to submit the required procedure; your main program will be ignored.

**Problem information**
