
Adjusted sum

X23872_en

Dessign the function *suma_ajustada(limit, k, maxim)* that, given three integers greater tha zero *limit*, *k* and *maxim*, returns the longest increasing list formed by consecutive multiples of *k* lower than *maxim* that add up less than *limit*. If the list is not emptemty its first element has to be *k*.

Sample session

```
>>> suma_ajustada(20, 3, 1000)
[3, 6, 9]
>>> suma_ajustada(10, 1, 1000)
[1, 2, 3]
>>> suma_ajustada(10, 1, 3)
[1, 2]
>>> suma_ajustada(100, 2, 10)
[2, 4, 6, 8]
>>> suma_ajustada(5, 4, 4)
[]
>>> suma_ajustada(5, 5, 50)
[]
```
