## Tracks

X49397\_en

---

There are a number of tracks that are part of a record label. Print the list of tracks in the appropriate format.

### Input

The input starts with an integer  $N$  denoting the number of tracks. The next  $N$  lines are on the format “<name>-<duration>”, where <name> is the name of the track and <duration> is an integer describing the duration in seconds.

### Output

For each track in the order they appear in the input, print one line:

Track: XXX [YYYs]

Here, XXX is the name of the track and YYY is its duration.

### Sample input

```
5
Money-390
Welcome to the Jungle-271
Hotel California-390
Bohemian Rhapsody-357
Yellow Submarine-159
```

### Sample output

```
Track: Money [390s]
Track: Welcome to the Jungle [271s]
Track: Hotel California [390s]
Track: Bohemian Rhapsody [357s]
Track: Yellow Submarine [159s]
```
