Up-down counter   X53256_en

Design a 4-bit up-down counter (mod 16). The counter must *count-up* when the input signal *up* is 1. Otherwise, the counter must *count-down*. After reset, the counter must be initialized at zero.

Specification

module *updown_count4*(*up*, *count*, *clk*, *rst*);
    input *up*, *clk* , *rst* ;
    output [3:0] *count*;

Input

- *up* is the input signal that indicates when the counter must count-up (1) or count-down (0).

- *clk* is the clock signal.

- *rst* is the synchronous reset signal.

Output

- *count* is the 4-bit output.
